BE INFORMED:

Know Your Risk During COVID-19
On a color scale, how risky is...

The best way to prevent illness is to avoid being exposed to this virus.

All activities have the potential to become high-risk if proper precautions are not taken by all individuals.

Southwest District Health recommends individuals take the following precautions to protect yourself and your community:

- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Inside your home: Avoid close contact with people who are sick. If possible, maintain 6 feet between the person who is sick and other household members.
- Outside your home: Put 6 feet of distance between yourself and people who don’t live in your household.
- Cover your mouth and nose with a cloth face cover when around others.
- Always cover your mouth and nose with a tissue when you cough or sneeze or use the inside of your elbow and do not spit.
- Clean AND disinfect frequently touched surfaces daily.

Ranked by public health experts from Southwest District Health.

HIGH RISK

Going to a bar/night club
Attending a large, crowded religious service, wedding, or funeral (indoors where physical distancing cannot be maintained)
Going to a sports stadium
Attending a large music concert
